

SUPER SHAKE GUIDE

The Super Shake: A meal in a glass

The Super Shake combines high-quality protein, fiber, good fats, vitamins, minerals, antioxidants, and other good stuff in a tasty, convenient formula.

It can replace a meal when you're in a hurry, or give you some extra protein and calories when trying to build muscle. The Super Shake isn't a specific shake, nor any particular recipe.

It's a concept. A template. Something that lets you choose your own nutritional adventure while getting high-quality nutrition and trusting that you're doing something good for your body.

You can follow our recipes. Or come up with your own, using the guide. Your call. Experiment. Try some stuff. Tailor the template to your needs. Most importantly: Discover what works for you, and what you enjoy. To create your own nutritious and tasty Super Shakes, follow the step-by-step guide here. Once you get the hang of things, take the concept out for a spin. See what you can create. Have fun.

The Super Shake Template

STEP 1: Pick a liquid

- Water
- Almond milk (unsweetened)
- Cow's milk
- Soy milk (unsweetened)
- Iced green tea
- Hemp milk (unsweetened)
- Coffee (for a morning shake)

You can also add crushed ice if you want a frosty shake, or leave it out. The less liquid you use, the thicker the shake will be.

STEP 2: Pick a protein powder

- Whey protein
- Egg white protein
- Rice protein
- Pea protein
- Hemp protein
- Other proteins or protein blend

Some protein powders have thickeners added. This will increase the thickness of your shake. Find a protein supplement that you digest well and enjoy the taste of. You can also use plain Greek yogurt or cottage cheese instead of protein powder.

STEP 3: Pick a fruit

- Berries
- Bananas
- Pitted cherries
- Apples
- Pineapple
- Mango
- Papaya
- Powdered fruit supplement

You can use fresh or frozen fruit. Any fruit you like.

STEP 4: Pick a vegetable

- Dark leafy greens: spinach / Swiss chard / kale
- Cooked pumpkin or butternut squash
- Cooked sweet potato
- Beets
- Cucumber
- Celery
- Powdered greens supplement
- Avocado

Spinach and celery are good bets, as they're virtually flavorless in your shake. Canned pumpkin is great too. It goes well with vanilla. When using beets, try roasting and removing the skin first. They go well with chocolate. If you add celery / cucumber, make sure to adjust the amount of liquid you add.

STEP 5: Pick a healthy fat

- Walnuts / cashews / almonds
- Peanut, natural peanut butter, other nut butters
- Flax, hemp, and chia seeds
- Coconut milk
- 1/4 to 1/2 avocado

Use 1-3 thumbs of fat, depending on your needs. Avocado in particular will give your shake a creamy consistency.

STEP 6: Blend that sucker up

STEP 7: Pick a topper (optional)

- Shredded unsweetened coconut
- Cacao nibs or grated dark chocolate
- Yogurt
- Oats, granola
- Cinnamon

If you want to get fancy, sprinkle something on top of your shake. A little goes a long way. Cinnamon is good with vanilla and pumpkin. Add oats if you need extra carbs, or yogurt if you want more protein and smoother consistency.
